

Anova Transcend™

Monitor All Your Assets in One Place.

With near real-time access to data, there is no more scalable, widely used platform for remote telemetry management than Anova Transcend™. Whether branded for your customers or used in-house, Anova Transcend supports monitored tank data, along with data from vaporizers, pipelines, PLCs, and other advanced systems. Digitizing the industrial gases supply chain at any scale has never been easier.

Beautiful Visualizations.

Simplifying the complex. Your data brought to life, for your operational ease.

Instant Insight.

Make informed decisions and act with confidence.

Dashboards, Your Way.

Customizable dashboards to focus on what matters most.

Anova Transcend™

KEY FUNCTIONALITY

ALL ASSETS. ONE PLATFORM

Monitor critical operating parameters from multiple advanced systems assets side-by-side with your tanks: levels, pressures, flow rates, and others.

NEAR REAL-TIME SPEED

Timely access to data backed by state-of-the-art cloud-based data storage.

HIGHLY SCALABLE

Able to support hundreds of thousands of assets with multiple measurements.

EASY RTU MANAGEMENT

Easily edit RTU settings and detailed asset info such as location, capacity, etc.

POWERFUL ANALYTICS

Create customized reports and beautifully visualized custom charts to gain actionable insight into your operations.

ULTIMATE SAFETY

Ensure safety and enable preventive maintenance with custom thresholds to trigger alerts and notifications.

INTEGRATED ERP CONNECTIVITY

Exchange and share data with back-office systems, including SAP and others.

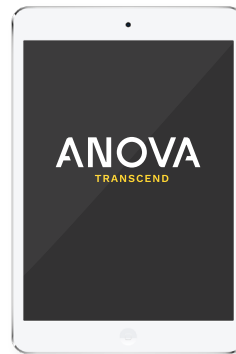

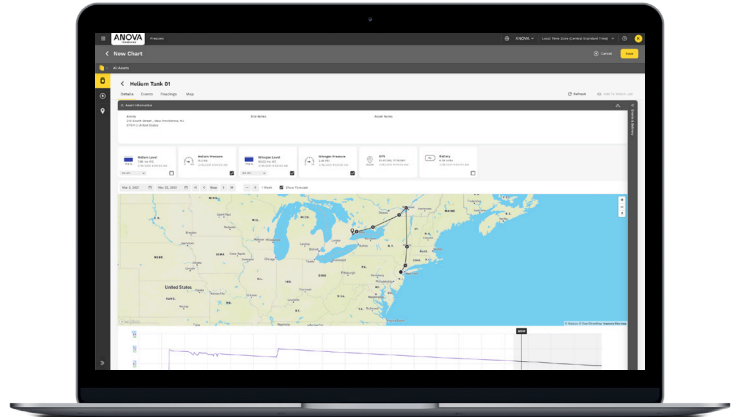

EXPERT CUSTOMER SUPPORT

Dedicated technical support with decades of experience in industrial gases, chemicals, and software integration.

TRACK YOUR MOBILE ASSETS

Integrated mapping for intelligent route planning and mobile asset tracking via GPS. Trigger geofence-enabled alerts such as departure, arrival, waypoint, or route deviation.

CONVENIENT, ANYWHERE ACCESS

Supported by multiple browsers. Runs on tablets, laptops, and desktops.

APPLY YOUR OWN BRANDING

Rebrand the application with your logo for in-house or customer users.
